

## **ENERGY CONSERVATION POLICY**

Siam Steel International Public Company Limited recognizes the critical importance of energy efficiency. Fully dedicated to conserving energy across all facets of its business operations, the Company has established the following Energy Conservation Policy:

1. Energy conservation is a part of duties of the Company's operation.
2. Comply with laws and other requirements relating to energy conservation and management.
3. Encourage energy conservation and effective natural resource allocation to bring about maximum benefits subject to energy management methods.
4. Encourage activities based on energy conservation to be carried out with regards to feature and amount of energy consumed to be in line with practical goals and measures of energy conservation in order to reduce the energy using, as well as continuously observe and develop efficiency in the energy using.
5. Encourage, create and educate all of the Company's employees including other persons participating in the Company's business operation to make them understand the Company's policy on energy conservation. This is to bring about consciousness and understanding so that the policy on energy conservation can be applied in all working processes.
6. Disseminate the policies and activities reducing the energy consumption to the public, and provide corporation with all both governmental and private sectors in the energy conservation.
7. To support the procurement of energy-efficient products and services, and encourage designs aimed at improving energy performance.
